

Sri Raghavendra Singh

MERN Stack Developer | Node.js Developer | React.js Developer | GenAI Integrations
Hyderabad, India | raghav.singh3177@gmail.com | 7799314944 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

MERN Stack Developer with 4+ years of experience building scalable web applications using Node.js, Express.js, React.js, and MongoDB. Experienced in designing RESTful APIs, developing responsive user interfaces, and integrating backend services in fintech and enterprise platforms. Hands-on experience integrating GenAI capabilities using Google Gemini API, LangChain, and RAG pipelines to build intelligent, context-aware features. Proven ability to deliver high-performance applications, optimize system performance, and collaborate in Agile development environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, HTML5, CSS3, Bootstrap, Material UI, Redux, jQuery

Backend: Node.js, Express.js, GraphQL, REST API Development, JWT Authentication, Middleware, MVC Architecture, Modular Monolith Architecture

GenAI & AI: Google Gemini API (free tier), LangChain, RAG (Retrieval-Augmented Generation), Prompt Engineering, Vector Databases (FAISS, ChromaDB), Hugging Face Embeddings (OpenAI API)

Databases: MongoDB, MySQL, PostgreSQL

Tools: Git, GitHub, GitLab, Postman, VS Code, Chrome DevTools, Jest, Jira

Deployment / Cloud: AWS, Docker, Nginx, Netlify, Render, CI/CD

Concepts: Microservices, Agile/Scrum, Performance Optimization, API Security, Responsive Design

PROFESSIONAL EXPERIENCE

M2P Fintech Pvt Ltd – Hyderabad, India

Software Engineer | August 2025 – Present

Tech Stack: Node.js, Express.js, React.js, MongoDB, PostgreSQL, GraphQL, REST APIs

- Developed scalable backend services using Node.js and Express.js for loan processing (LOS) and BNPL payment workflows.
- Designed and integrated RESTful APIs for loan applications, approval workflows, and customer onboarding.
- Implemented backend services for transaction processing and integrated third-party fintech APIs for payment and credit processing.
- Built responsive React.js UI components to improve usability across fintech products.
- Collaborated with cross-functional teams to ensure seamless frontend-backend integration.
- Optimized API performance and database queries, improving system efficiency and application reliability.

DEFTeam Solutions Private Limited – Hyderabad, India

Software Engineer | July 2022 – July 2025

Tech Stack: React.js, TypeScript, JavaScript, Redux, Material UI, Node.js, MongoDB, REST APIs, Jest, Git

- Delivered 10+ enterprise-grade UI modules using React.js and Redux, improving user engagement by 15% and reducing bug reports by 30%.
- Built scalable front-end architecture with React.js and Material UI, reducing page load time by 30% and increasing feature development speed by 40%.
- Integrated RESTful APIs and backend services using Node.js and MongoDB, reducing API response time by 25%.
- Utilized React Hooks, Context API, and Redux for complex state management across large-scale enterprise modules.
- Delivered 20+ reusable React components, cutting development time by 25% across multiple projects.
- Optimized UI performance by 35% through lazy loading, code splitting, and Webpack enhancements.
- Implemented unit testing with Jest and React Testing Library, achieving 90% bug-free application releases.
- Coordinated with QA teams to resolve UI bugs and participated in Agile ceremonies — standups, sprint planning, and retrospectives.

Software Engineer Intern | January 2022 – July 2022

Tech Stack: HTML5, CSS3, JavaScript, React.js, Git

- Contributed to development and styling of responsive user interfaces using HTML5, CSS3, and JavaScript.
- Developed reusable React components and collaborated with the team following Agile/Scrum workflows.

PROJECTS

AI-Powered Portfolio Assistant (Personal Project)

Tech Stack: React.js, Node.js, Google Gemini API (free tier), LangChain, RAG, FAISS, Hugging Face Embeddings (OpenAI API), MongoDB

- Built a conversational AI assistant embedded in the personal portfolio that answers visitor queries about projects, skills, and experience using Retrieval-Augmented Generation (RAG).
- Implemented a LangChain pipeline to chunk and embed resume/project data into a FAISS vector store using Hugging Face free sentence-transformer embeddings for semantic document retrieval.
- Integrated Google Gemini API (free tier) with a custom prompt for context-aware, grounded responses — architecture adaptable to paid APIs such as OpenAI GPT-4.
- Designed a Node.js/Express.js backend API layer to handle user queries, orchestrate LangChain retrieval, and stream responses to a React.js chat UI.
- Deployed on Render with environment-secured API key management and rate limiting for safe public access.

CIM Finance LOS – Loan Origination System (M2P Fintech)

Fintech platform streamlining end-to-end loan origination.

- Built Node.js/Express.js backend services and designed RESTful APIs for loan applications and approval workflows.
- Developed React.js UI components for customer onboarding and processing dashboards.

CIM BNPL – Buy Now Pay Later (M2P Fintech)

Scalable BNPL payment platform with flexible payment options.

- Implemented backend transaction processing with Node.js and integrated third-party fintech payment APIs.
- Built dynamic React UI components for a seamless user payment experience.

PAMS – Performance Appraisal Management System (DEFTeam Solutions)

Enterprise application for managing employee performance and appraisal workflows.

- Built responsive React.js UI with Material UI achieving 30% load time improvement.
- Implemented role-based access control with Context API and developed RESTful APIs for appraisals and employee feedback.

NEWWE – Employee Management System (DEFTeam Solutions)

Gamified EMS for employee profiles, attendance, and task tracking.

- Led component design and API integration using React.js, Node.js, Express.js.
- Secured routes with JWT authentication and MongoDB for structured data storage.

EDUCATION

Loyola Academy, Hyderabad — Master of Computer Applications (MCA), Computer Science | June 2019 – June 2022

Siddhartha Degree and PG College — Bachelor of Computer Applications (BCA), Computer Science | June 2016 – June 2019
